

Keyholder Care – Are You Covered?

When you or your keyholders are called out to a site, who makes sure they return home safely?

This innovative service makes sure someone knows if there is a potential problem...

How the service works

1. The site alarm activates and the Alarm Receiving Centre calls the nominated keyholder.
2. Once they have accepted the call, there is a follow up text message to their mobile phone.
3. This text message gives a 1-hour time window to attend site and return home safely.
4. 10 minutes before the hour is up, a second message is sent reminding the keyholder to call back in to close down the Keyholder Care record or alternatively extend the time window.
5. If the keyholders are unable to carry out these actions, the nominated emergency contact point will be called and notified that they have failed to carry out these actions.
6. The emergency contact is able to take the appropriate steps for your safety.

The benefits to you

- Simple set up
- Peace of mind for keyholders and employers
- Provides employers with a duty of care solution
- Cost effective service
- Available today from 'Your Business'

£75.00
Per annum, per site
(Irrespective of number of keyholders or call outs)
